Coastal Community Bank

The bank is a strong regional financial institution headquartered in Everett, Washington and has branches around Puget Sound. The bank prides itself of strong customer service and accessibility.

Their Problem

The area around Olympia, Washington is among the fastest growing places in America, and increasingly competitive. Coastal needed to open a bank branch in a newly developed part of town and to do it faster than the expected competition. Their return on investment depended upon speed and keeping costs down. Their reputation depended upon continued service excellence, including convenient locations.

Our Solution

The building was operational around 100 days after the contract with distributor Williams Scotsman was signed. The grand opening beat the competition by months, and the price was under that of site-built options. The interior of the bank also was a plus for customers who described the building as comfortable and relaxing, two important details when questions of money are at stake.
