

WHITLEY MANUFACTURING

CASE STUDIES • EDUCATION

FOR: Marysville (WA) Schools
TYPE: School Campus
WITH: Williams-Scotsman

"The custom designed school was built in sections at the Whitley Evergreen production facility. More than 120 pieces were joined together, somewhat similar to the way a Boeing 787 is assembled. Inside are enough single-story classrooms for 400 students and several common areas with 28'-0" high ceilings and glass to bring in natural light."

-From Snohomish City Herald (Eric Stevick)
