CASE STUDIES • EDUCATION

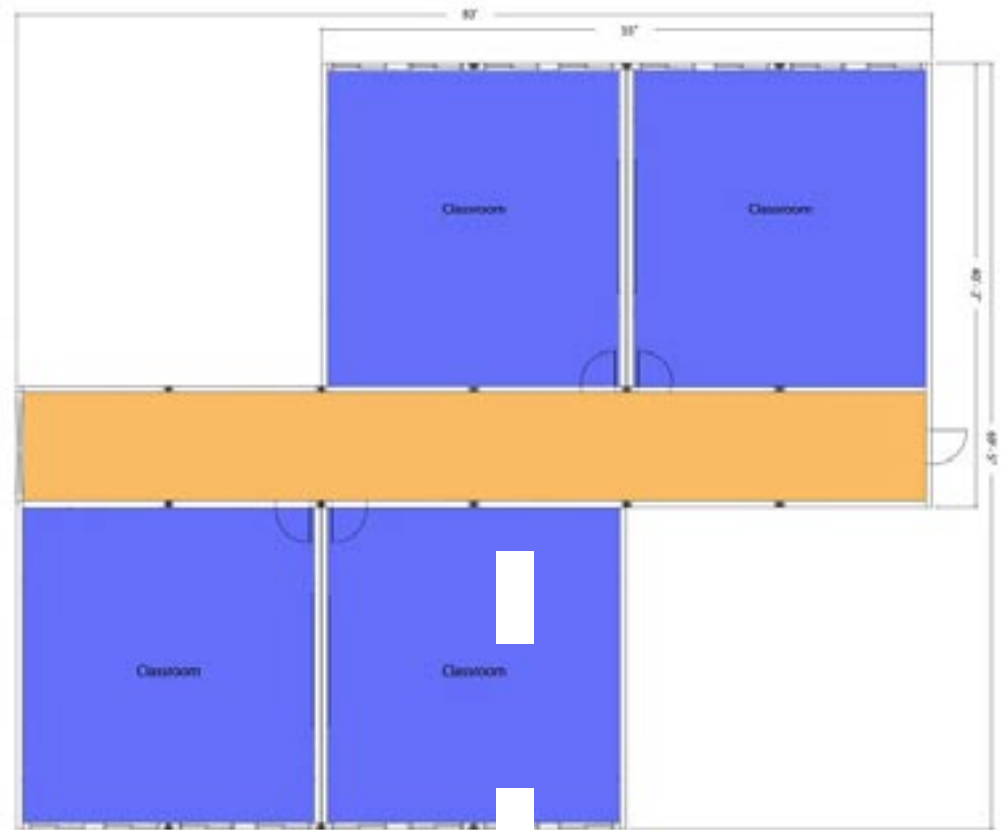

FOR: East Hampton USFD
TYPE: High School
WITH: M-Space Holdings

East Hampton is the easternmost town on Long Island. The town enjoys scenic views of the ocean and over seventy miles of Atlantic Ocean frontage. The East Hampton Union Free School District provides education for the town with the goal of promoting excellence and preparing its students for higher education.

East Hampton High School - 4200 SF

THEIR NEED

A common problem facing school systems everywhere is overcrowding. With growing enrollments and shrinking budgets, schools are forced to find innovative solutions. This was the case with East Hampton High School on Long Island. In the past, the school had used modular buildings to alleviate overcrowding. The school turned to M-Space Holdings and Whitley Manufacturing to construct a four-classroom addition on an accelerated timeline.

OUR SOLUTION

Whitley Manufacturing and M-Space Holdings designed a four classroom building with a staggered layout. This arrangement gives the school the flexibility to add additional classroom space in the future.

The building is constructed to meet the strict NY Code Compliance and was built to 2C non-combustible construction. The building features 3" poured concrete floors, 18 ga. steel framing and a 9'-0" finished ceiling height. The HVAC system allows for zoned / individualized control, allowing each room to adjust the temperature individually.
