HIGH-CEILING CLEARSPAN

(Patent Pending)

WHITLEY MANUFACTURING

APPLICATIONS

Cafeteria

Offer wide open and spacious cafeteria and auditorium spaces. Could be used with schools, universities, or employee cafeterias.

Gymnasium

You can now offer your customers a turn-key school building using only modular units. Can attach seamlessly to modular locker / shower facilities.

Warehouse

Free-standing or attached warehouse space for the industrial sector or in addition to modular office or laboratory space.

Other

High-Ceiling Clearspan is also perfect for churches (sanctuary / worship areas) and fire / EMT stations (vehicle storage and parking bays).

Shipping

The high-ceiling roof system folds into nearly flat sections for ease of shipment.

Flexibility

Create buildings with ceiling heights up to 26', up to 76' widths between support columns, spanning hundreds of feet in length.

Speed

Sections fold from flat to finished and are fastened in place in minutes. Even large structures can be set in hours.

Versatility

The High-Ceiling Clearspan system can be used to provide space in combination with standard modular units or as stand-alone structures.
