

MODULAR BUILDINGS for EDUCATION.

Whether you need one or more classrooms, an administrative office, or an entire school Whitley Manufacturing has a modular building to meet your requirements. Offering both standard and custom plans Whitley can quickly provide a wide range of options for your facilities needs. Whitley has constructed modular schools ranging in size from 1,500 to 60,000 square feet for both temporary and permanent use.

This 40,000 square foot, two-story modular School facility accomodates 700 students and contains 28 classrooms, a cafeteria, administrative offices, computer laboratory, media center, restrooms, stair-wells, and an elevator. The project involved a unique combination of modular and conventional construction. The building was occupied only 14 weeks after on-site construction was started.

This 6,600 square foot Modular School includes 6 classrooms and restrooms for over 150 students. This building concept is a unique series of pre-engineered floor plans that offer semi-customized educational facilities from 4,000 to 20,000 square feet. The result is a high-quality, cost-effective structure available within 6-12 weeks after receipt of order.
